The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (claim 1, 20, 12 26 and 28), particularly using a power switch to determine whether to load software for a device based on how long the power switch is depressed after an initial power off state. When the power switch is depressed for a predetermined amount of time, the software will be loaded for the device. If the power switch is not depressed for the predetermined amount of time, the said software will not be loaded for the device.
